

The central platform
Data exchange made easy

firstbase connects senders and receivers of product master data

As a supplier, you make a significant contribution to our service provision and patient welfare. Traceability, counterfeit protection and patient safety are important aspects of this. Master data plays a key role in this.

firstbase from GS1 Switzerland is a platform that allows you to efficiently exchange up-to-date, complete and trustworthy product master data.

On the central platform, the product master data is provided and kept up-to-date by you as a supplier. The product content is aggregated, consolidated and quality assured on the platform. We and all affiliated hospitals adopt your data as data recipients from firstbase for our purchasing, logistics and sales processes.

Help digitize the Swiss healthcare system. Start by entering your product master data in the user-friendly firstbase web portal or upload xls tables simply by drag & drop or use a high-performance firstbase API interface or the GS1 GDSN® data pool.

Become part of the solution.

The Global Language of Business

Become part of the solution – your benefits

<p>Simply</p> 	<p>The data can be easily entered in the user-friendly firstbase web portal or easily uploaded as an xls table using drag & drop.</p>	<p>Reach</p> 	<p>New product data and changes are available immediately and to everyone. This ensures that your business partners can always work with correct and up-to-date product data.</p>
<p>Open</p> 	<p>The firstbase API interface enables fast and simple integration - optionally in a next step.</p>	<p>On demand</p> 	<p>Modular pricing model: If required, connection to various databases (e.g. LIR, NHS), GS1 GDSN® or regulatory databases such as EUDAMED, GUDID and the planned Swiss Database on Medical Devices (swissdamed).</p>
<p>Efficient</p> 	<p>Your product master data is checked and quality assured. They are centrally available to all your customers. This saves you the maintenance and delivery of multiple xls templates for each recipient.</p>	<p>Ecosystem</p> 	<p>Your master data is available at any time and across systems: You are part of the solution and thus part of the ecosystem.</p>

GS1 Switzerland is guided by the following basic principles:

 <p>From members for member</p>	 <p>Not-for-profit</p>	 <p>From the source</p>	 <p>Once only</p>
---	--	---	---

From members for members – as a **not-for-profit organization**, GS1 Switzerland supports its members along the entire supply chain.

From the source – because only you as the product manufacturer know the correct master data.

Once only – You send to only one platform and can serve the entire market from it, including regulatory databases. Conversely, the hospitals as data recipients only need one interface to firstbase to access all data.

The central data exchange platform firstbase is just right for you. Contact GS1 Switzerland and discuss how you can use firstbase for your business:
